

# READY EXTENDED LIFE COOLANT (-40 ° C)

## SNF Type Long Life Ready to Use

### Definition

It is a long-lasting, ready-to-use coolant formulated with organic additive technology (OAT) that ensures the engine operates at the ideal operating temperature in any climate. It perfectly protects the cooling systems of all iron and aluminum alloy engines against rust and corrosion. It does not contain nitrite, amine, phosphate, borate and silicate in accordance with environmental health regulations.

### Places of Use

In aluminum and other types of radiators, it is used in summer and winter as it prevents the radiator water from freezing in cold weather and boiling in hot weather. Ready to use, no need to add water.

### Features and Benefits

- It has much longer life than conventional antifreezes.
- Protects the engine against cold and heat with its high thermal stability and heat transfer feature.
- It prevents freezing of engine coolant in cold weather.
- It prevents the engine coolant from boiling in hot weather.
- Provides long-term corrosion protection in iron and aluminum alloy engines.
- It is compatible with all sealing elements.
- Provides protection against foam formation.

### Typical Features \*

Color		Light pink
Density @ 15 ° C, kg / m <sup>3</sup> pH,	ASTM D-1122	1.07
100%	ASTM D-1287	8.55
Reserve alkalinity (ph 5.5)	ASTM D-1121	2.1
Freezing Point, ° C	ASTM D-1177	- 40
Boiling Point, ° C	ASTM D-1120	109

\* Values may differ from production to production.
