

Super Antifriz

Description

It is antifreeze containing rust, corrosion, and wear and foam-inhibiting special additives.

Application

It is used in aluminum or other type radiators. It is recommended both in winter/summer, since it prevents freezing/boiling of the coolant.

Benefits

- Reduces the freezing point.
- Increasing the boiling point of the coolant and thus prevents the boiling of coolant in summer.
- It prevents rust and corrosion in the cooling system.

Performance
