

## Mega Gres WR Series

### Lithium/Calcium Soap High Performance Grease

#### Description

Mega Gres WR is a Li/Ca soap high performance grease with reinforced formulation and especially designed for water resistancy under heavy conditions.

#### Application

It is used in medium and high speed operations where excessive impact loads are present. It is recommended for wide range of industrial and automotive applications. Especially for roller bearings at the wet conditions on steel industry. It is suitable for operation between -20°C to 130°C.

#### Benefits

- Provides excellent protection under severe and impact loading with high-pressure resistance property.
- Extends bearing service life by minimizing the wear and aging.
- Reduces the cost of maintenance and labor.
- Provides excellent protection against rusting and corrosion.

Typical Specifications*		
	Mega Gres WR1	Mega Gres WR2
NLNLGI	1	1
Soap	Lithium/Calcium	Lithium/Calcium
Base Oil Viscosity, cSt at 40°C	150	150
Droppin Point, °C, min	185	185
Timken OK, 50 lb	Pass	Pass
Weld Load, kg	250	250

\* Values are changeable according to production.
