

Süper Gres MP-2

Lithium Soap Automotive Grease

Description

It is multi-purpose grease containing oxidation additive and lithium soap, developed as lubricants for chassis and wheel bearing in the automotive industry.

Application

It is used for all chassis members that requires greasing, mainly for medium speed rolling bearings of light and medium loading conditions in automotive industry. It is recommended for wheel hub of heavy-duty vehicles and construction equipment.

Benefits

- Provides extended protection for especially wheel bearings of all vehicles, thanks to its remarkable thermal stability.
- Ensures extended lubrication without carryover by sticking on the bearings, thanks to its resistance to the water.
- Ensures excellent use in especially high performing passenger car with its resistance to carryover.
- Protects the bearings against rusting and corrosion.
- Ensures long service life with its oxidation resistance.

Typical Specifications*

Penetration, 25°C, worked	ASTM D-217	282
Drop Point, °C	ASTM D-566	185
Oil Separation, % wt., (40°C, 42hr)	IP-121	3.24
Acidity Alcalinity, %	ASTM D-128	1.8

* Values are changeable according to production.

Packing

Tin	0.9 kg, 4 kg, 16 kg
Drum	180 kg
